INDUSTRY & LOGISTICS

ALPHATRONICS

innovators in access technology

ACCESS OPTIMISATION ON INDUSTRIAL SITES

Queuing at the entrance or exit?

Frustrated visitors struggling to reach you? Employees, visitors, contractors and suppliers want smooth and safe access.

To control and monitor site access, we use various technology such as:

- Automatic barriers
- Turnstiles
- Registration kiosks
- Digital signage

Besides physical closure, keeping cyber threats out is at least as important.

Our connected solutions are screened daily and are secure against cyber attacks.

IOT

Our devices are monitored online using our Cloud platform **Aliot**. There, we collect data on performance and identify potential problems. **AI-based maintenance** is essential to minimise unplanned downtime.

AUTOMATISATION

To avoid human interactions, the entire process is automated. For example; the ticket printer has been replaced by license plate recognition. No more hassle with lost tickets, ticket paper replenishment or paperjam resolution.

TAILOR-MADE IN BELGIUM

Alphatronics is a **manufacturer** of customised perimeter security solutions with the flexibility to adapt security needs to a specific situation.

In-house development and production, modularly designed to integrate with other (logistics) business processes.

It is in our DNA to **innovate** and in doing so, we always deliver the highest quality.

SOFTWARE INTEGRATION

We feature a **very accessible RESTfull API**. This enables the integration of Alphatronics-supplied hardware devices and a third-party software solution.

INSTALLATION AND SERVICE

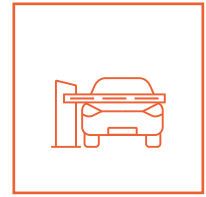

With more than **35 years of experience** in installation and service, we offer the expertise for perfect integration of your entire system.

A maintenance contract guarantees that the system will always be up and running.

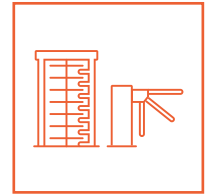

The helpdesk with professional and fast service is always ready for support.

COUNT ON ALPHATRONICS FOR

- an extensive and innovative product range
- creative and sophisticated solutions
- technical and commercial support
- project strategy
- excellence in system integration
